

**ATTENTION MIDDLE SCHOOL
SCIENCE TEACHERS!
Announcing Hands-on, Outdoor Science
Field Trips Grades 6-8!**

HNC is offering a unique, science-based field trip with hands-on activities focused on understanding climate change impacts. These place-based programs align with the Next Generation Science Standards (NGSS) - Disciplinary Core Ideas (DCIs) in the earth and life sciences, and promote wise stewardship of our islands. This fall's program takes place in a forest ecosystem. There is a discount for booking multiple field programs and/or field trip dates. Scholarships are available for Title 1 schools and non-Title 1 public schools that are in need of funding support.

Understanding Climate Change Impacts in the Ahupua'a

Mauka Field Trip - Makiki Valley

Students will learn the basic science of climate change and how humans are the main contributors of today's global warming. The day is packed with three hands-on activities out in the field that relate to sustainability and doing our part in helping to slow down the worst effects of climate change.

- **Stream Investigations/Water Quality**
- **Adventures in Biomimicry**
- **Forest Explorations**
