

**Fall 2020 Registration for Middle School Science Teachers!
Hands-on, Outdoor Science Field Trip for Grades 6 to 8!**

**Understanding Climate Change Impacts in the Ahupua'a
Mauka Field Trip (Makiki Valley)**

HNC is offering a unique, science-based field trip with hands-on activities focused on understanding climate change impacts. This place-based program aligns with the Next Generation Science Standards (NGSS) - Disciplinary Core Ideas (DCIs) in the earth and life sciences and promotes wise stewardship of our islands.

There is a discount for booking multiple field programs and/or field trip dates. Scholarships are available for Title 1 schools and non-Title 1 public schools that are in need of funding support. We will offer our Makai AND Mauka program in Spring 2021. For fee information, check out our website - <https://hawaiinaturecenter.org/oahu-programs-for-schools/>

Students will learn about the basic science of climate change and how humans are the main contributors of today's global warming. The day is packed with three hands-on activities in the classroom and forest ecosystem that relate to sustainability and doing our part in helping to slow down the worst effects of climate change.

- **Stream Investigations/Water Quality**
 - **Adventures in Biomimicry**
 - **Forest Explorations**

TO REGISTER:

Email: schools@hawaiinaturecenter.org

Reservations will be processed in the order in which the email was received.
