

# 2024 FALL SCHOOL REGISTRATION OPENS THURSDAY, APRIL 25 | 9 AM - 1 PM

Hawai'i Nature Center's outdoor programs promote environmental stewardship and are relevant to the Next Generation Science Standards (NGSS). Fall semester is September through mid-December 2024. The program times listed allow for a 30-minute lunch.

## Mark your calendars!

Registration for Spring 2025 programs opens September 3. A flier will be sent to school with registration information.

## *how to reserve your field trip*

- **Call the specific telephone numbers listed as reservations are made on a first call, first-serve basis.**
- Do not leave a voice message. Any reservations left on the voice mail will be answered after the registration period.
- After April 25, email your school reservation request to [Education@HawaiiNatureCenter.org](mailto:Education@HawaiiNatureCenter.org).
- For questions prior to registration, call (808) 955-0100 (ext. 131). DO NOT call this number on registration day.
- **Funding Support.** Title 1 schools may be eligible for scholarships. Award notification is given upon reservation.

## *themes by grade levels*

### **GRADE 1: Introduction to Plants, Animals & Healthy Habitats 9 am-12:30 pm (808-457-0360)**

Explore habitats in Makiki Valley including meadow, stream, and forest with emphasis on survival needs, food chains, and stream life.

### **GRADE 2: Cycles in Nature 9 am - 12:30 pm, Makiki Valley (808-457-0387)**

Examine the importance of five main cycles in nature (plant and animal life cycles, nutrient, gas and water cycles) while hiking, stream fishing and hunting for decomposers. Discover how cycles are interconnected and how humans are a part.

### **GRADE 3:**

#### **Discovering Wetlands at Honouliuli National Wildlife Refuge**

**9 am - 12:30 pm (September 2024-January 2025)**

**(808-457-0405, 808-457-0336)**

Learn about wetlands in 'Ewa and how adaptation, interdependence and dispersal play key roles in this ecosystem. Discover the threats to endangered Hawaiian wetland birds and how conservation efforts are enabling their survival.
